PŘEDKONTAČNÍ DOKLAD PRO ROZPOČTOVÁ OPATŘENÍ

The diagram illustrates the structure of a DNA double helix. It shows two antiparallel strands. The sugar-phosphate backbone is represented by a series of circles (sugars) and lines (phosphates) connected by lines. The nitrogenous base pairs are represented by horizontal bars connecting the two strands. The base pairs are labeled as follows:

- Adenine (A) pairs with Thymine (T)
- Guanine (G) pairs with Cytosine (C)
